## SUMMARY

As a professional Full Stack Developer, I have deep experience with **HTML5**, **CSS3**, **JavaScript**, and **React.js**. With expertise in back-end development using **Node.js** and **Express.js**, I have managed data effectively using **MongoDB**. As a productive and efficient developer, I quickly learn new technologies and deliver high-quality work. By understanding client needs, I develop everything from templates to custom applications that enhance user experience.

## SKILLS

HTML5

CSS3

Tailwind CSS

Bootstrap

Git/Github

JQuery

C language

JAVASCRIPT(ES6)

ReactJS

NodeJS

MongoDB

ExpressJS

## STRENGTHS

### Leadership

guiding, inspiring, and empowering

### Creativity

Proficient in basic web technologies

### Communication Skills

Known for excellent communication

### Problem-Solving

through innovative web design solutions.

## EDUCATION

### BCA

📍 Surendranagar, India

**Shree Swami Vivekanand Collage**

### H.S.C

📍 Surendranagar, India

**SP School**

### S.S.C

📍 Surendranagar, India

**SSMV School**

## PROJECTS

### E-Commerce Website(Shoes Website)

📅 2024

🔗 [Code](#)

- I have developed a shoe website. The website features a user-friendly design, responsive layout. It includes an functionality that allows users to select their desired products and add them to the shopping cart for purchase. The design is enhanced using Bootstrap, while JavaScript is utilized to implement dynamic features like product interactions and the cart system.

### Node JS (Admin Panel)

📅 2024

🔗 [Code](#)

- I developed a scalable and secure admin panel using Node.js, Express.js, MongoDB, and EJS. The project features user authentication, data visualization, and reporting. I overcame challenges related to data security, scalability, and performance by implementing solutions such as encryption, caching, and load balancing.

### Responsive Website

📅 2024

🔗 [Code](#)

- I created a responsive clothing website using **HTML**, **CSS**, and **Bootstrap**. It features a clean design with a navigation bar, product display cards, and a footer. Each product card shows an image, price, and description, with hover effects for interactivity. The site is optimized for all devices, providing a seamless user experience.

### Airline website

📅 2024

🔗 [Code](#)

- I created an airline website using **HTML** and **CSS**. The site includes a navigation bar for booking, destinations, and offers, with a banner showcasing services. The design is clean, featuring styled flight booking forms and visually appealing CSS effects.
